Instructions for use

You are allowed to modify this template and use it for teaching and learning slide.

1. Professional Branding
   - **Colours & Fonts:** Use only official IMU styles to maintain a consistent look.
   - **Primary Colour:** Use IMU Blue (Hex: 270089) for headings and accents.
   - **Contrast:** Ensure text stands out sharply against the background for easy reading.
2. Easy-to-Read Text
   - **Headings:** Size 32 (in IMU Blue).
   - **Subheadings:** Size 24 – 32.
   - **Body Content:** Keep it between 18 – 24 (if it's smaller, there's too much text!).
   - **Small Print:** Size 16 for captions; size 10 for source credits.
3. Clean Layout
   - **Relevant Visuals:** Only use images that help explain your teaching points.
   - **Remove Clutter:** Avoid distracting icons, busy backgrounds, or "wall of text" slides.
   - **White Space:** Leave empty space on the slide to help students focus on what matters.

EMPLOYEE MOTIVATION

Poor morale shows up through

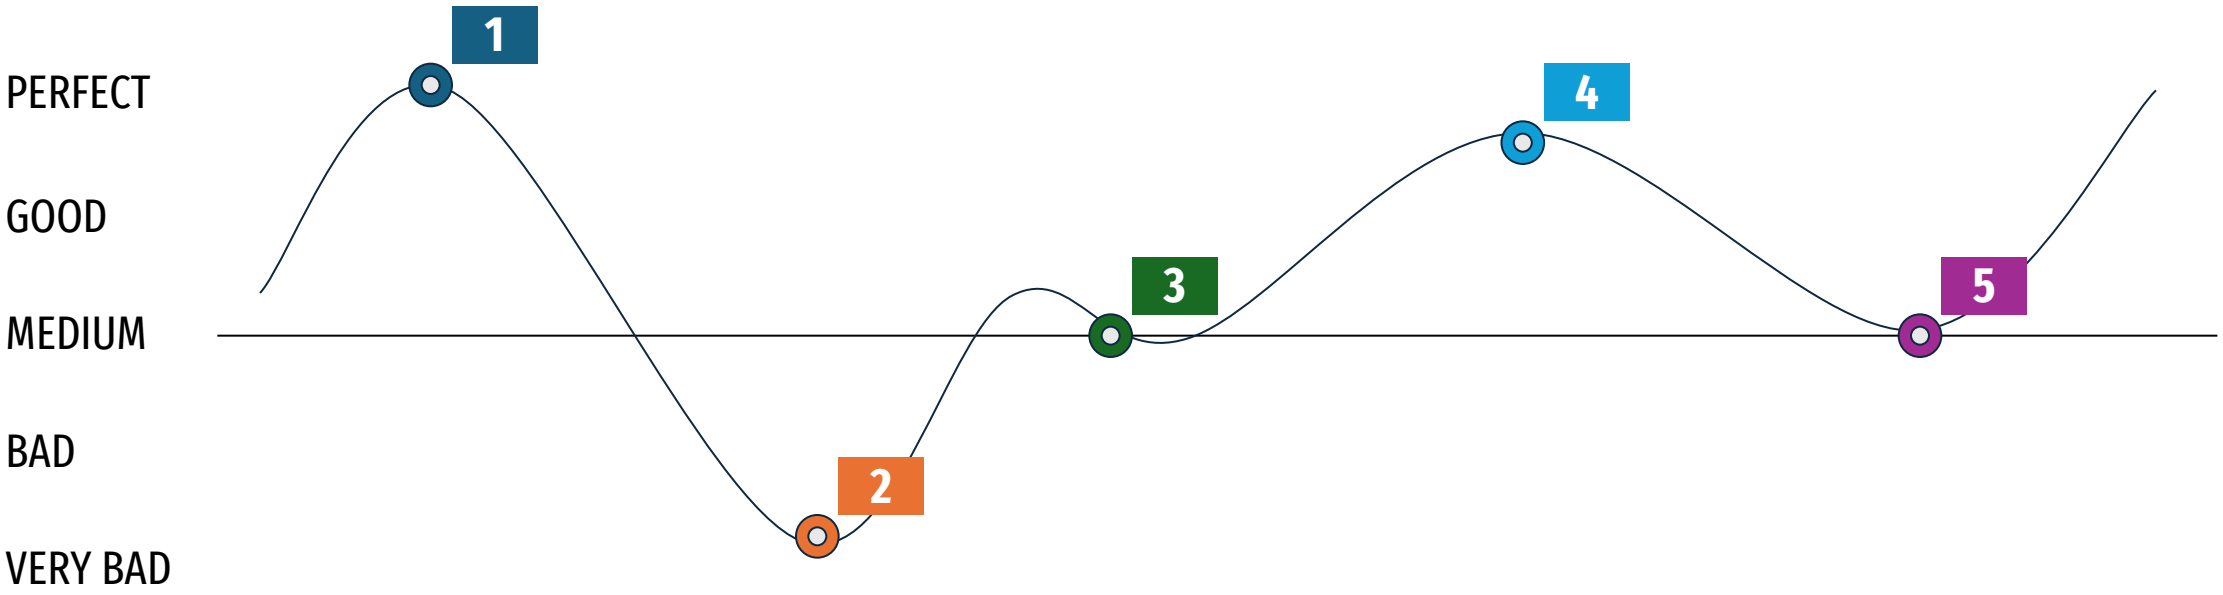

- Absenteeism
- Strikes
- Rising employee grievances
- Employee Turnover
- Failing Productivity

Neptune is the farthest planet from the Sun
Mercury is the smallest planet in the Solar System
Earth is the third planet and is where we live on
It’s full of iron oxide dust, which gives the red color we can see
Jupiter is the biggest planet in the entire Solar System
Venus has a beautiful name, but is terribly hot
Saturn is a massive ball made mostly of hydrogen and helium

Take Home Message

Shift in Focus Due to Lack of Major Pandemics

Pharmaceutical companies focused more on non-communicable diseases after the absence of a major pandemic.

Immunotherapy for Non-Communicable Diseases

Immunotherapy is a promising area for treating non-communicable diseases, deserving further exploration through self-directed learning.

COVID-19: A Reminder of Ongoing Threats

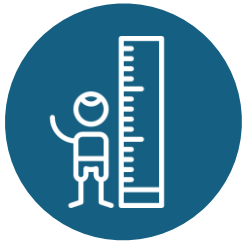

The COVID-19 pandemic in 2020 reminded the world that infectious diseases continue to be a major global threat.

Immunology's Role

Immunology is crucial for fighting both infectious diseases and non-communicable diseases (e.g., cancer, diabetes).

Emerging Technologies in Immunology

Immunotherapy and nucleic acid vaccines are likely to shape the future of immunology over the next decade.
